The Dell AI Factory

Dell's approach to help customers embrace and implement AI

EXPERT AI SERVICES

An effective AI Factory needs a skilled team to succeed, but AI-ready skills are in short supply and the ecosystem is diverse

Dell has extensive experience guiding customers through their AI journeys, accelerating AI outcomes aligned to business objectives while utilizing the right technical solutions at scale

DATA: FUELING THE AI FACTORY

Data is the raw material that powers the AI Factory
Most valuable data is on-premises and at the edge
Dell helps you bring AI to your most valuable data and is a leader in storing, protecting and managing that data

AI OPTIMIZED INFRASTRUCTURE

Infrastructure is the foundation of the AI Factory
AI use cases are diverse and AI technologies are rapidly evolving
Dell has the broadest AI portfolio from client to cloud allowing you to right size your AI investment and giving you the flexibility to run AI anywhere

AI OPEN ECOSYSTEM

No single vendor can meet all your AI needs
Dell has a proven history of nurturing open ecosystems and is committed to building a broad AI ecosystem giving customers greater access to innovation and flexibility

OUTCOMES POWERED BY USE CASES

The AI Factory produces business outcomes powered by your highest priority use cases
Dell simplifies the deployment of your most important AI uses cases with validated solutions and tailored services

Dell AI Factory Accelerates AI Adoption

SIMPLE

Comprehensive AI services and validated, optimized solutions make AI easier, augmenting skills gaps and addressing data readiness

SECURE

Trusted infrastructure, full-stack solutions and services ensure valuable data is protected, managed and accessible

ECONOMICAL

Industry's broadest AI solutions portfolio addresses "no one-size-fits all" approach

The Dell AI Factory

Dell's approach to help customers embrace and implement AI

Hundreds of use cases – where do you begin?

Business strategy and operations management	Product innovation and R&D	Manufacturing and supply chain	Marketing, sales, and customer service	IT, HR, and finance
<ul style="list-style-type: none"> • Project management resource/task scheduling, budgeting, optimization and alerts • Resource utilization and sustainability optimization • Partner insights, optimization and contract compliance/recommendations • Identify and understand regulatory changes and impacts • Predict consequences and outcomes, anticipate workloads and demand • Facilities management optimization (smart buildings) • Automated meeting transcription, summarized notes and follow-up assignment • Meeting scheduling automation (bot) • Infectious disease screening of employees and customers (health and safety surveillance) • Predictive and adaptive environmental safety screening 	<ul style="list-style-type: none"> • Design idea brainstorming and image generation • Scientific data and literature search and summarization • Fast-fail candidate screening • Identify unmet needs, underserved constituencies and unintended consequences • Identify new product/service opportunities • Medical/imaging diagnostics and personalized medicine • Population/public health analysis and campaigns 	<ul style="list-style-type: none"> • Inventory and supply chain logistics, routing, scheduling, budget optimization, and alerts • Traffic management, optimization and emergency response adaptation • Manufacturing process quality control and alerts • Reduce material waste (materials and equipment tracking, utilization, forecasting, optimization) • Sales floor/display/site optimization • Video/sensor surveillance, risk assessment, and mitigation • Sound/light/air/water pollution compliance and minimization • Fleet, plant and equipment utilization/ productivity optimization • Predictive maintenance for fleet and equipment 	<ul style="list-style-type: none"> • Draft copywriting (campaign messaging, customer personalization, translation) • Sentiment analysis, customer scoring and next best offer • SEO/keyword optimization/automation • Sales training/coaching • Customer support content screening, learning, search, and summarization • Customer service chatbot/digital human • Automated customer review responses • Derived market trends from unstructured data sources • Lead identification, qualification, ranking, and targeting • Customer churn risk assessment and alerts • Validate and protect customer/patient data • Identity verification 	<ul style="list-style-type: none"> • AI coding and documentation assistant • Code QA and testing, synthetic data creation • Log screening and early warning system • Network engineering resiliency, optimization, and self-healing • Metadata extraction and synthesis (NLP, GraphQL-readable tagging) • Intelligent search • Predictive maintenance for network, compute, and storage hardware • Automated penetration testing • Candidate resume screening • Employee performance screening • Personalized training (content and delivery) • Employee churn risk assessment and alerts • Fraud/waste/abuse detection and prevention • Human and financial resource forecasting, and budgeting

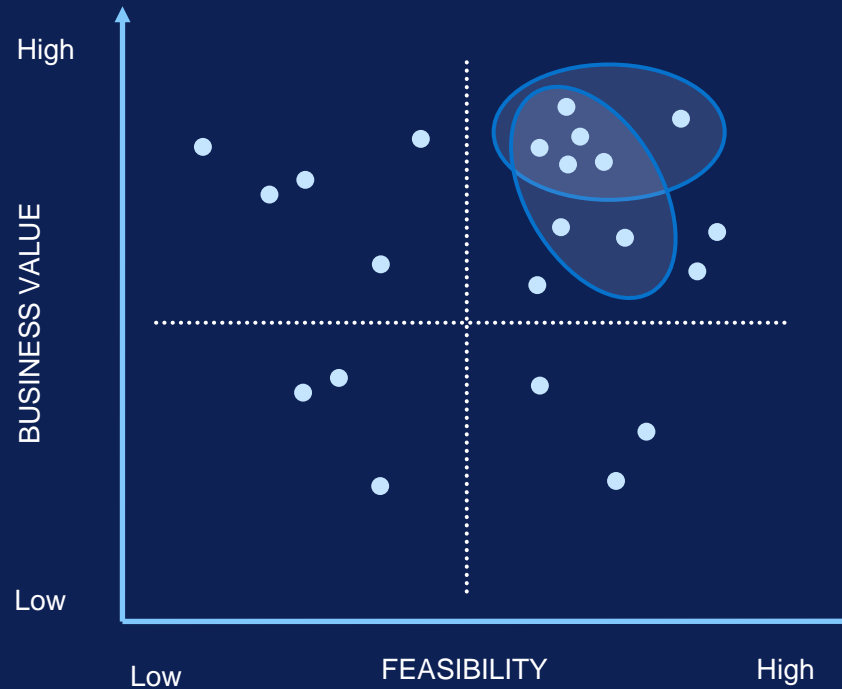

Most organizations have more than 200 use cases

Prioritizing Generative AI use cases

Criteria for consistently evaluating use cases

Business value criteria

-  More
-  Better
-  Faster
-  Cheaper

Feasibility criteria

-  Data
-  AI model
-  Process
-  People
-  Platform

 Content creation

 Digital assistant

 Natural language search

 Design and data creation

 Code generation

 Document automation

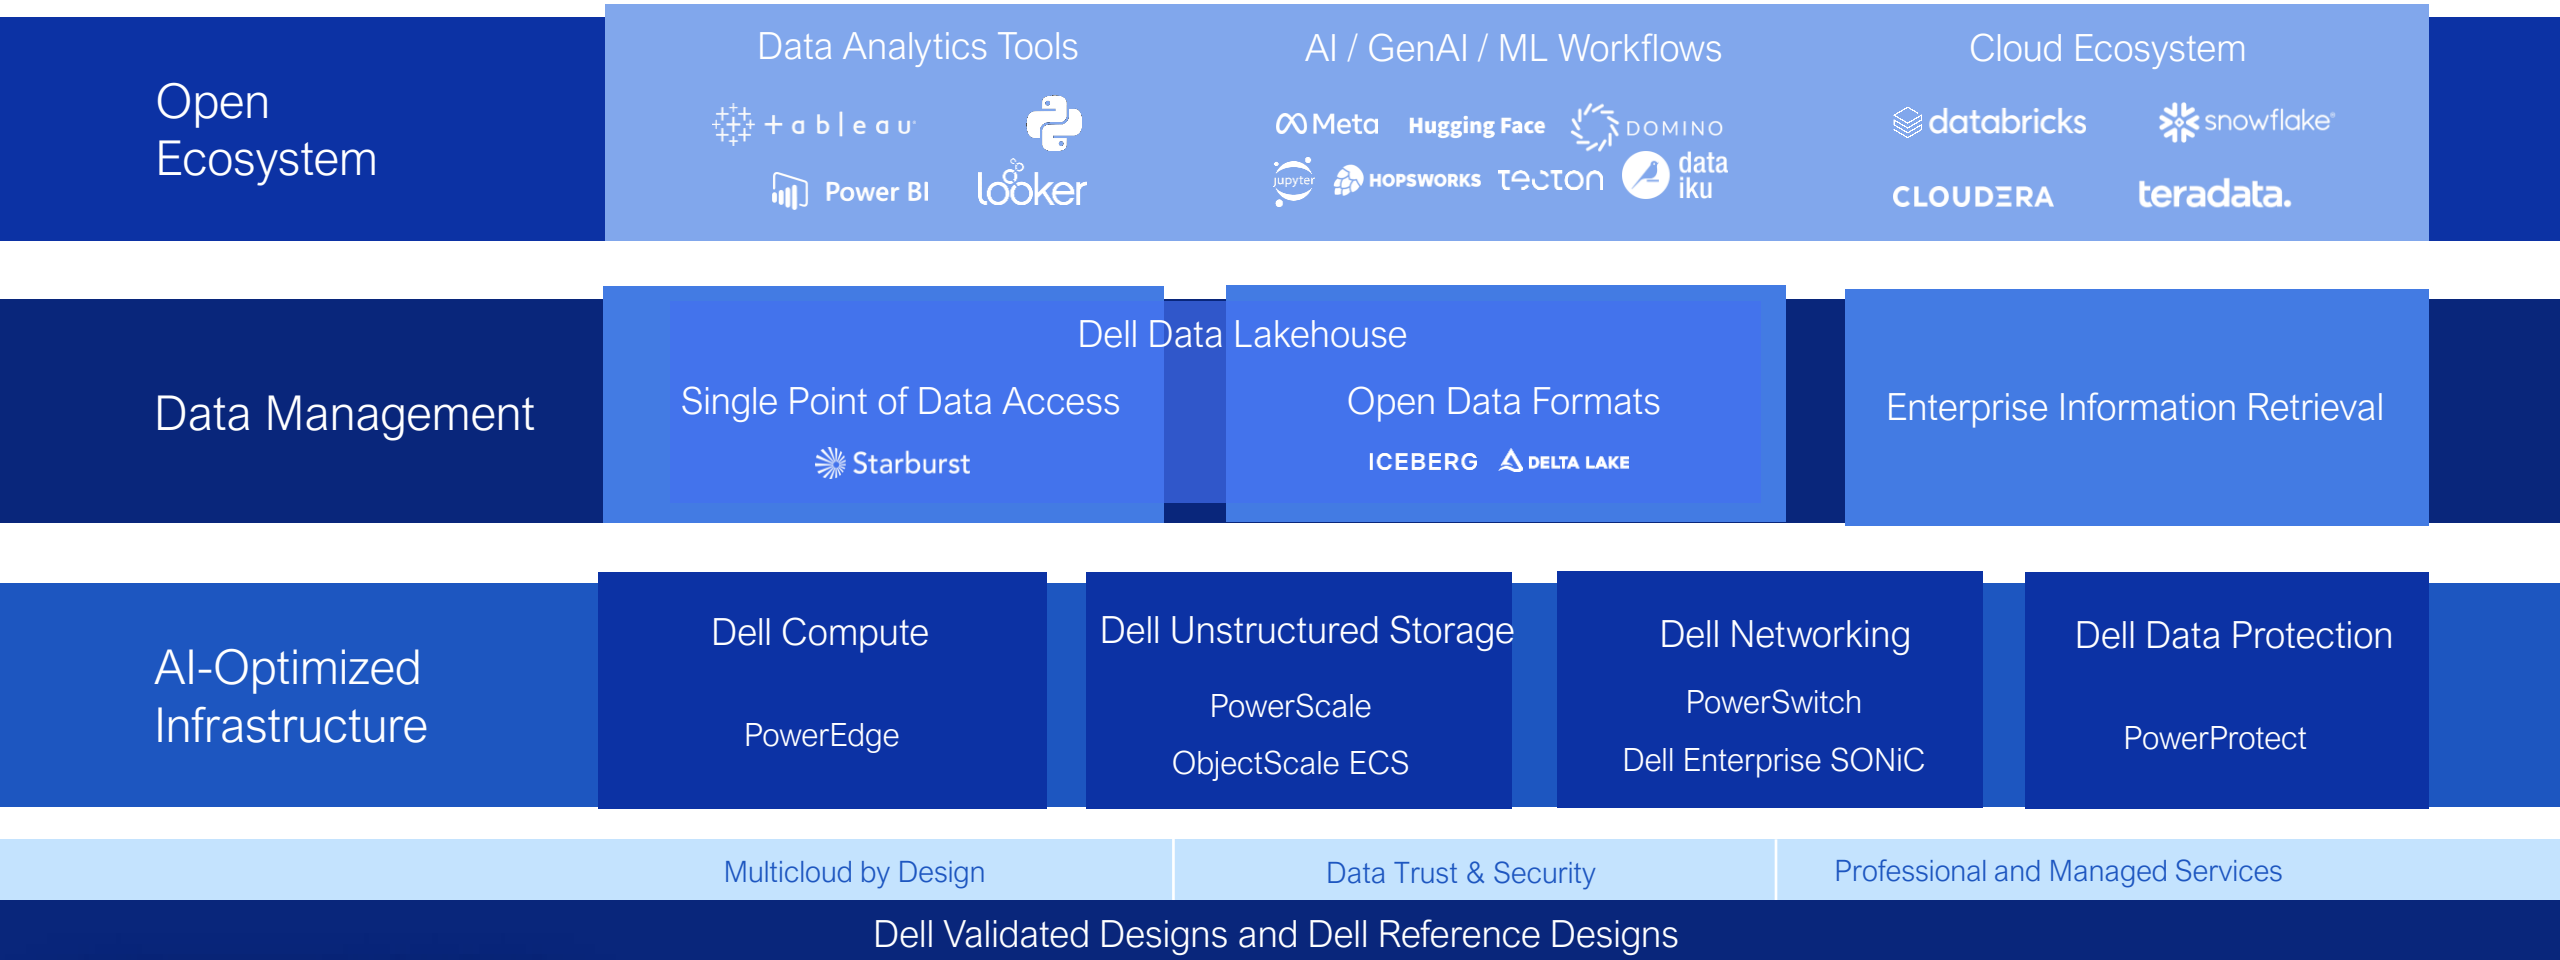

The Dell AI Factory

Dell's approach to help customers embrace and implement AI

AI starts with better data management and preparation

Dell AI-Ready Data Platform

Why bring AI on-prem to your data?

Data sovereignty is key to sustained success

Deliver secure
access to
valuable data

Increase
visibility into
data & models

Maintain
control over
how AI is used

73% say data and intellectual property are too valuable to be placed in a GenAI tool where a 3rd party may have access.*

Data

DELLTechnologies

Cost is a major consideration for LLM inferencing

Dell commissioned a study with Enterprise Strategy Group (ESG) comparing the expected costs to inference LLMs on-prem with Dell infrastructure vs. **public cloud IaaS** and **API services**¹.

Over a three-year period, Dell can provide inferencing that is up to:

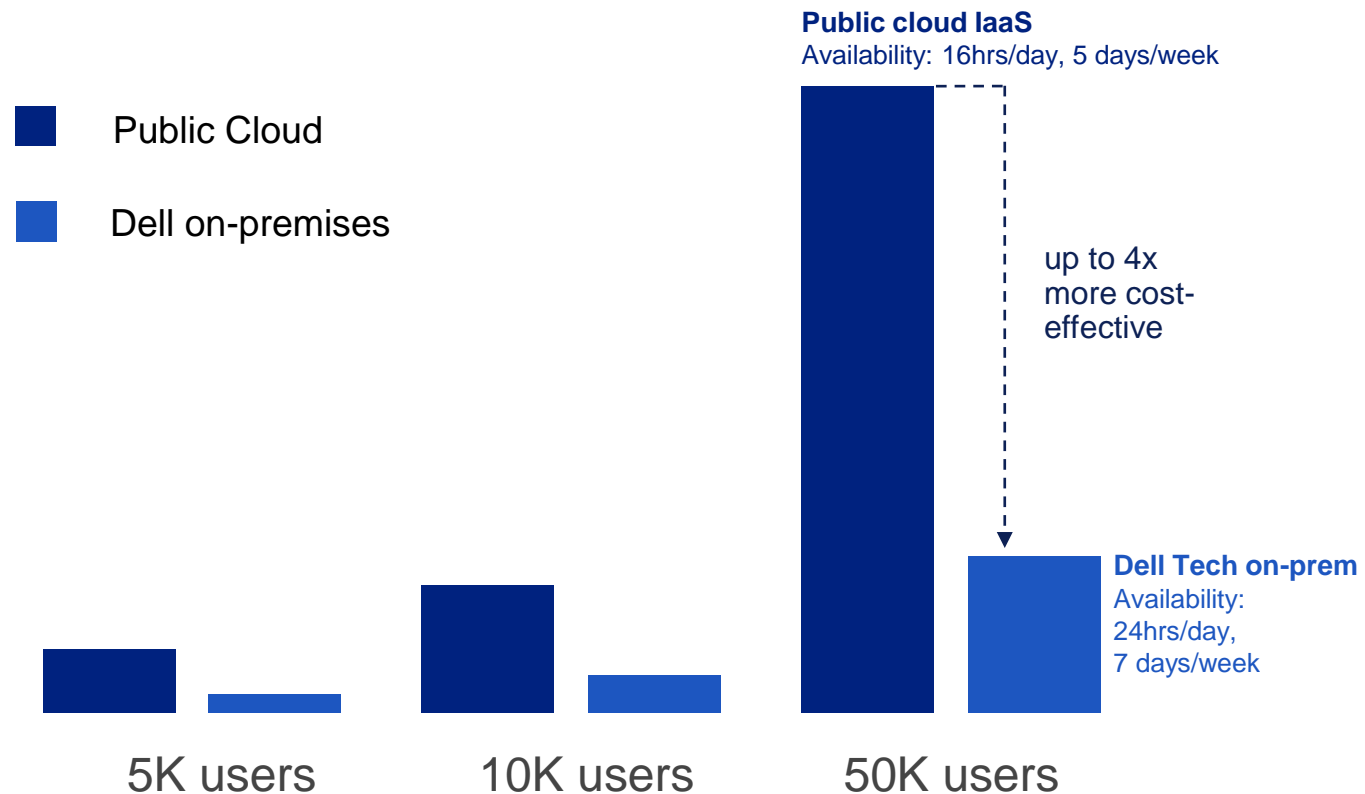

4x

more cost-effective than public cloud IaaS

8x

more cost-effective than token-based API services

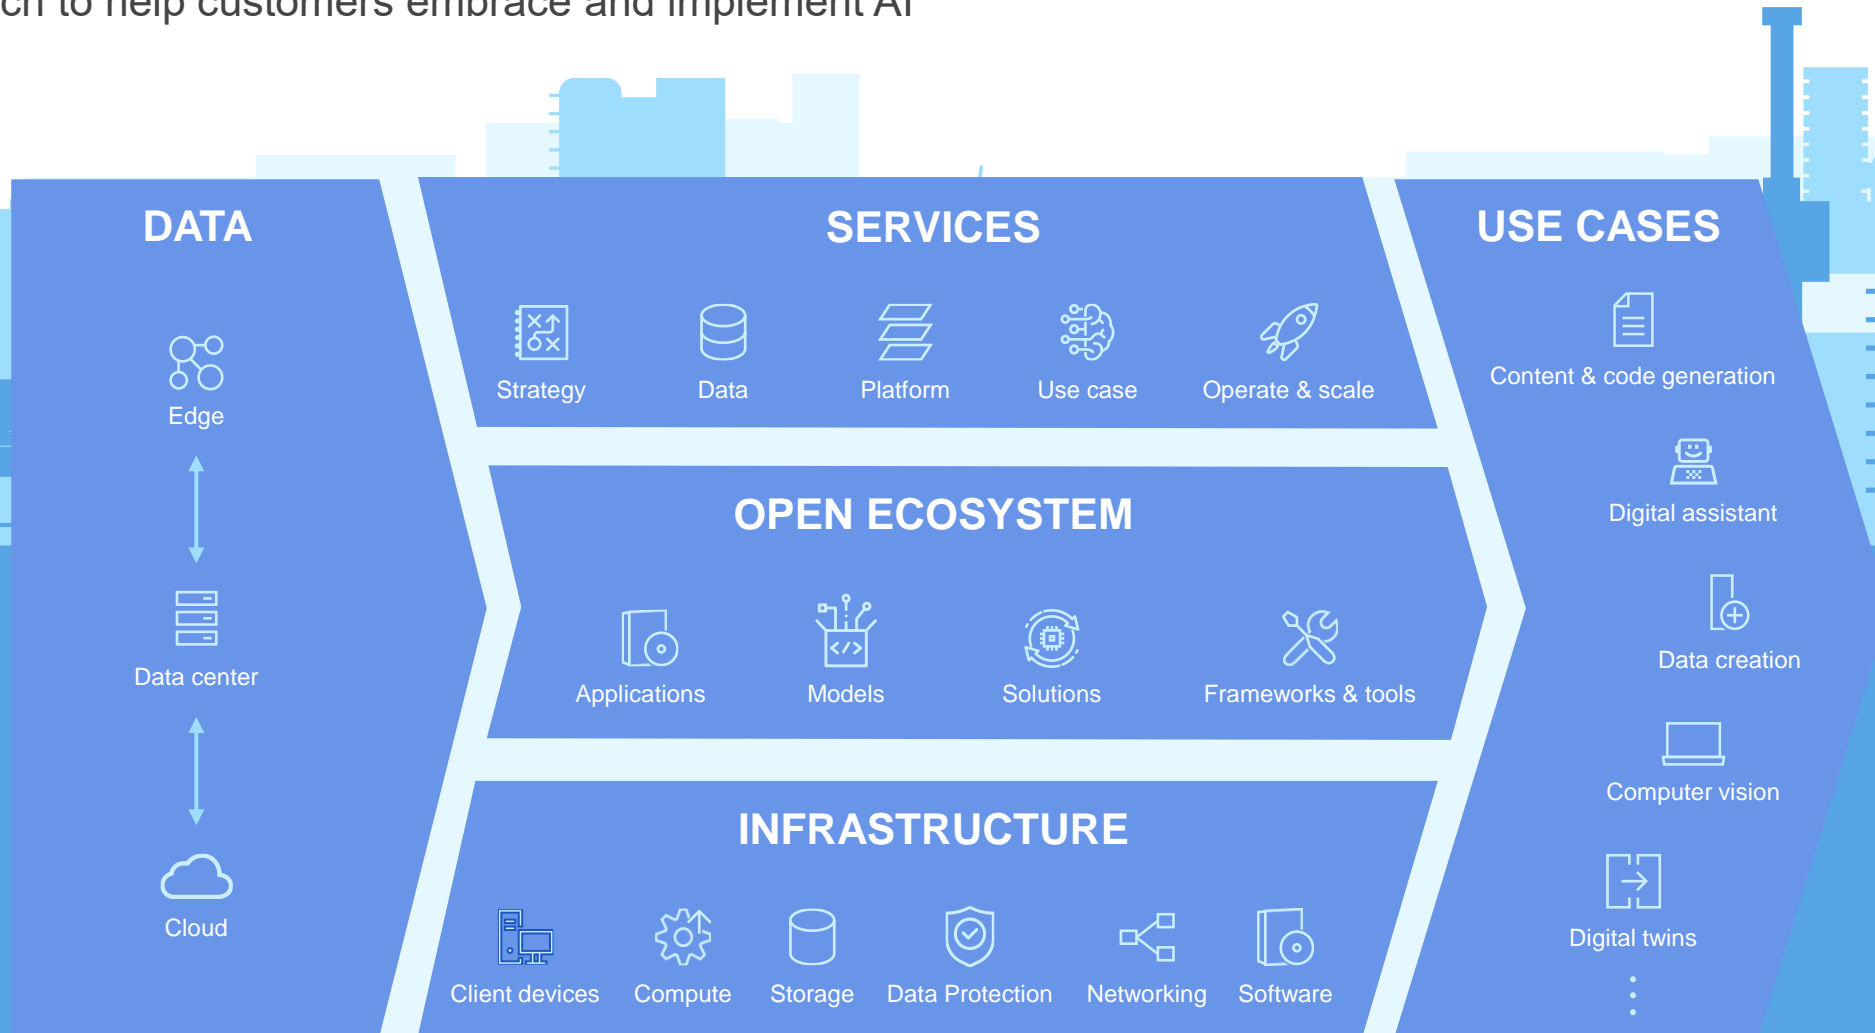

Expected Cost to Deliver Inferencing for 70B Parameter Llama 2 LLM Using RAG

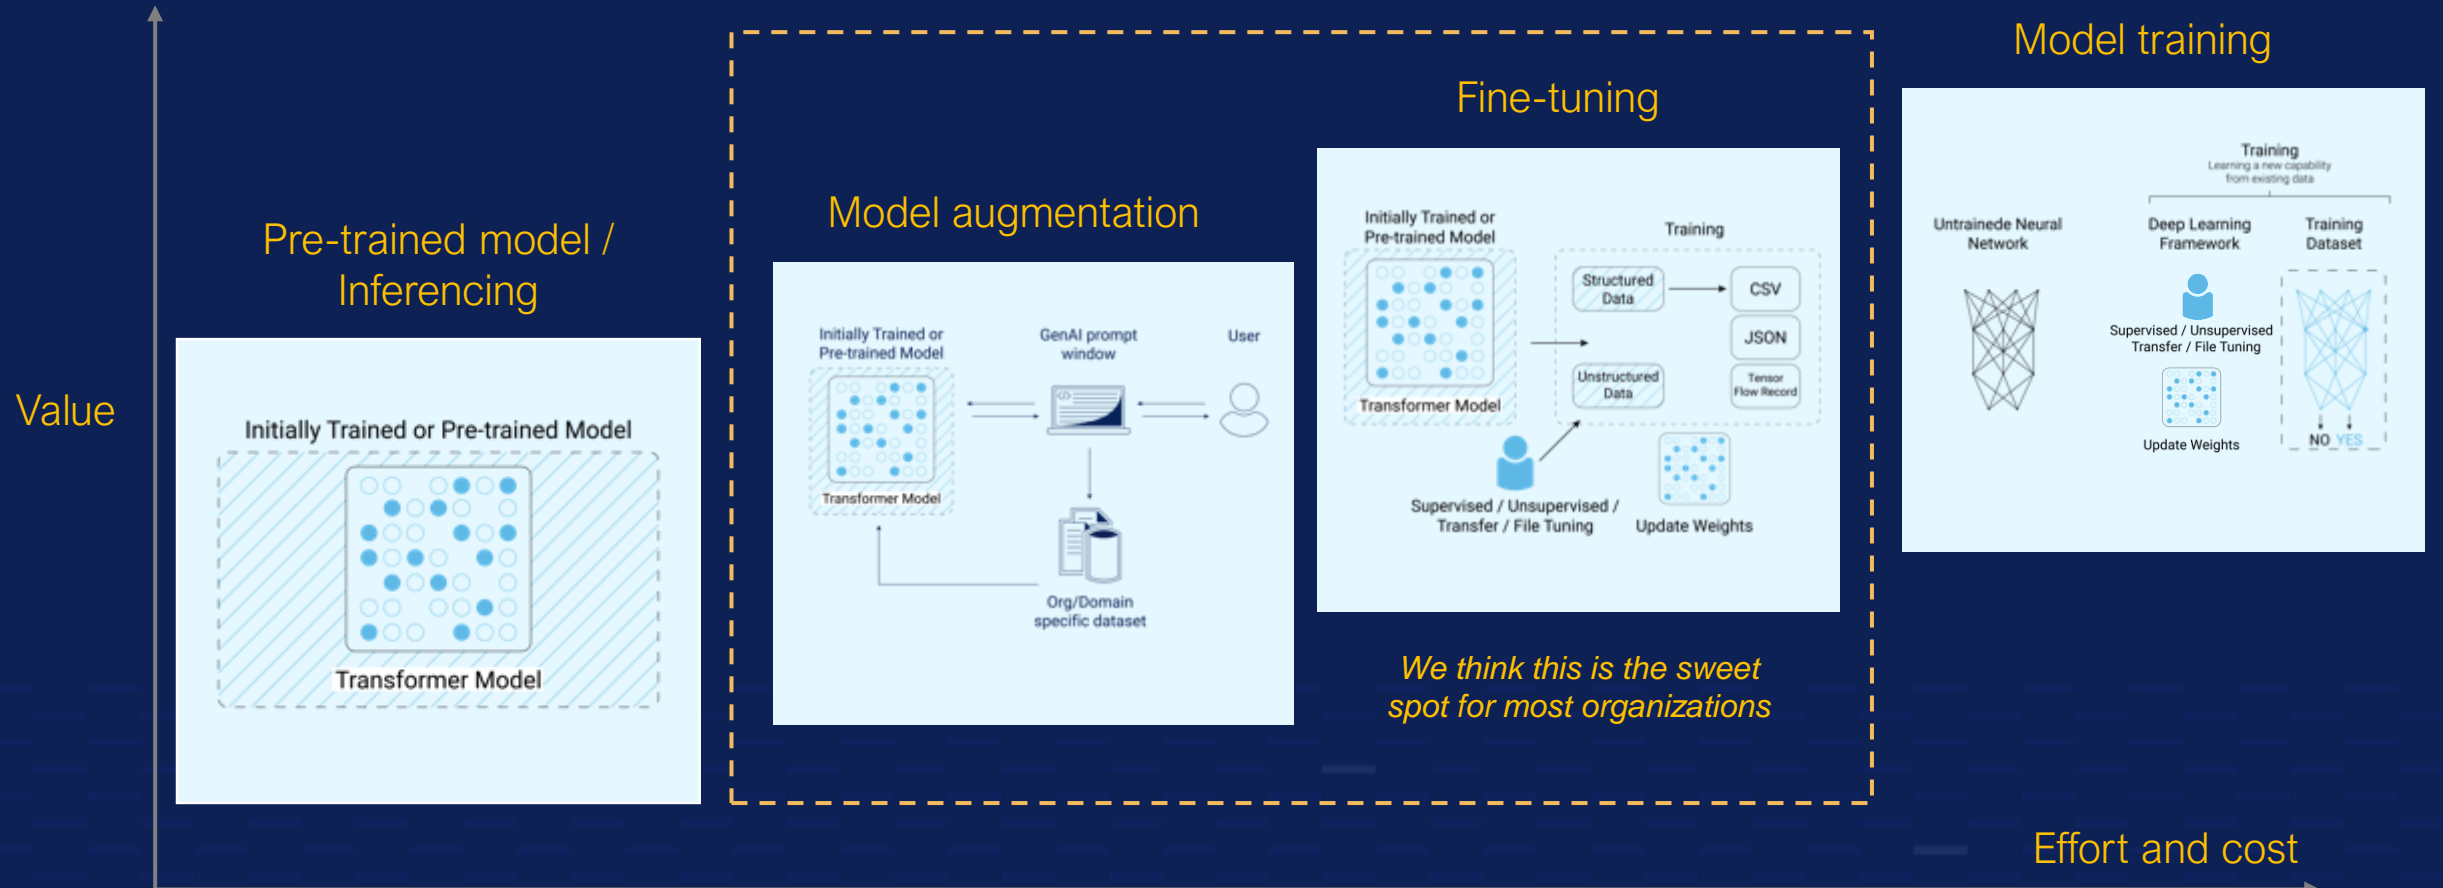

1. Based on Enterprise Strategy Group research commissioned by Dell, comparing on-premises Dell infrastructure versus native public cloud infrastructure as a service, April, 2024. Analyzed models show a 7B parameter LLM leveraging RAG for an organization of 5k users being up to 38% more cost effective while a 70B parameter LLM leveraging RAG for an organization of 50k users being up to 75% more cost effective. Actual results may vary.
